<u>Chemistry</u>	13
<u>Physics</u>	15
Technology Education	
<u>Business, Accounting and Financial Studies (BAFS)</u>	17
<u>Information and Communication Technology (ICT)</u>	19
Personal, Social & Humanities Education	
<u>Chinese History 中國歷史科</u>	21
<u>History</u>	22
<u>Economics</u>	23
<u>Geography</u>	25
<u>Tourism and Hospitality Studies</u>	27

This curriculum guide introduces the updated curricula of the four CORE subjects and TEN ELECTIVE subjects offered to current HTYC students in Senior Secondary (SS) Education. In response to the proposed curriculum changes put forth by Education Bureau in February 2021, HTYC has also adjusted the curriculum structure from 2021-22. For further information, students and parents can refer to the NSS webpage of the Education Bureau (EDB):

English: HYPERLINK "<http://334.edb.hkedcity.net/EN/index.php>"

<http://334.edb.hkedcity.net/EN/index.php>

Chinese: HYPERLINK "<http://334.edb.hkedcity.net/>"

<http://334.edb.hkedcity.net/>

Plan for Senior Secondary Education in HTYC

As an EMI school, and with student intakes having good potential and capacity, HTYC has a firm direction in offering an education which enables students to pursue university studies. Therefore, the new senior secondary (NSS) curriculum, while enlarging the scope of knowledge and skills for students, crucially hinges on the maximization of students' competitive edge for university admission.

HTYC Curriculum Structure for S4-6 in 2021-

- The subject combinations and groupings are structured to fit the interests and preferences of students based on data regularly collected through student surveys. Students are given a large number of choices in elective subjects.
- In response to the proposed curriculum changes put forth by Education Bureau in February 2021, HTYC has also adjusted the curriculum structure as follows:
 - The basic structure is 4 core subjects + 3 electives
 - Students choose their 3 electives from a list of 10 Category A subjects offered by the school
 - Students can also choose Mathematics Module 2

HTYC Curriculum Structure starting from 2021-22

Classes	S.4A	S.4B	S.4C	S.4D
4 Core Subjects	English	English	English	English
	Chinese	Chinese	Chinese	Chinese
	CSD	CSD	CSD	CSD
	Math	Math + M2	Math	Math
Block 1	Phy Chem Bio His C His ICT Geo Eco BAFS THS			
Block 2				
Block 3				
Others	Ethics & Religious Education, Physical Education, Music Life Wide Learning, Home-Class			

CSD = Citizenship and Social Development

LWL = life-wide learning

ICT = Information and Communication Technology

BAFS = Business Accounting and Financial Studies

*THS = Tourism and Hospitality Studies (DSE subject first offered at HTYC in 2021-22)

Foundation in Junior Secondary Education

Students are to build up a strong foundation of language proficiency and generic skills in S.1-3 through language trainings in Chinese, English and Putonghua, Project-based Learning (PBL) Scheme, STEAM Education and Reading-to-learn Scheme, etc. Students are also to build up career awareness and perspectives through career-related projects and further studies and career guidance.

The Y.W.C.A. Hioe Tjo Yoeng College
Senior Secondary Curriculum
English

Part 1: Curriculum framework

Overall Aims of the English Language Education Curriculum

- To provide every student of English with further opportunities for extending their knowledge and experience of the cultures of other people as well as opportunities for personal and intellectual development, further studies, pleasure and work in the English medium; and
- To enable every student to prepare for the changing socio-economic demands resulting from advances in information technology; these demands include the interpretation, use and production of materials for pleasure, study and work in the English medium.
- 10.5% – 13% of the total lesson time.

Part 2: Curriculum

The senior secondary English Language curriculum covers both the Compulsory and Elective Parts, which include the learning of English Language in the Interpersonal, Knowledge and Experience Strands.

To optimise the teaching arrangements, the Elective Part components would be fully integrated into the Compulsory Part from September 2021 onwards.

The Compulsory Part

In the Compulsory Part, we will continue with what we do at junior secondary level, i.e. delivering the learning content by way of the task-based approach to language learning. The learning and teaching of the four language skills, grammar, communicative functions, vocabulary and text-types will be emphasised.

Themes and concepts are explored through tasks. Different resources and authentic materials will be used to suit the interests, needs and abilities of our students. With these, students will be able to have a framework that enables them to learn in purposeful and authentic situations. Cross-curricular topics will also be covered.

The Elective Part

The Elective Part includes a range of extension modules which reinforce different aspects of English Language learning. It serves the purposes of adding variety to the English Language curriculum, broadening students' learning experience and catering for their diverse needs and interests.

Students will be engaged in a variety of activities to develop their language skills, generic skills and cultural awareness, and to gain understanding and knowledge of the topic in focus. They will also be provided with opportunities to demonstrate their learning or achievements through producing verbal or written output. Depending on the nature of the modules, this may be in the form of a performance, a display or a portfolio consisting of learners' work and reflections.

Part 3: Assessment

Component	Outline	Weighting	Duration
Public examination	Paper 1 Reading	20%	1½ hours
	Paper 2 Writing	25%	2 hours
	Paper 3 Listening and Integrated Skills	30%	About 2 hours
	Paper 4 Speaking	10%	About 20 minutes
School based Assessment (for school candidates only)		15%	

The Y.W.C.A. Hioe Tjo Yoeng College
Senior Secondary Curriculum
Mathematics

Part 1: Curriculum framework and time allocation

	Total lesson time
Compulsory Part	10% – 12.5%
Compulsory Part with a module	15%

Part 2: Curriculum

Compulsory Part:

<ol style="list-style-type: none"> 1. Quadratics equations in one unknown 2. Functions and graphs 3. Exponential and logarithmic functions 4. More about polynomials 5. More about equations 6. Variations 7. Arithmetic and geometric sequences and their summations 8. Inequalities and linear programming 9. More about graphs of functions 10. Basic properties of circles 	<ol style="list-style-type: none"> 11. Locus 12. Equations of straight lines and circles 13. More about trigonometry 14. Permutation and combination 15. More about probability 16. Measures of dispersion 17. Uses and abuses of statistics 18. Further applications 19. Inquiry and investigation
--	--

Extended Part:

Module 2 (Algebra and Calculus)

<ol style="list-style-type: none"> 1. Surds 2. Mathematical induction 3. Binomial theorem 4. More about trigonometric functions 5. Introduction to the number e 6. Limits 7. Differentiation 8. Applications of differentiation 9. Indefinite integration 	<ol style="list-style-type: none"> 10. Definite integration 11. Applications of definite integration 12. Determinants 13. Matrices 14. System of linear equations 15. Introduction to vectors 16. Scalar product and vector product 17. Applications of vectors 18. Inquiry and investigation
---	--

Part 3: Assessment

Compulsory Part

Senior Secondary Curriculum
Biology

Part 1: Curriculum framework and time allocation

Compulsory Part	72 % (180 hours)
Elective Part	20 % (50 hours)
Investigatory Studies	8 % (20 hours)

Total lesson time: 250 hours for S4 to S6

Part 2: Curriculum

Compulsory Part: - both core and extended components will be covered in the curriculum

I.	Cells and Molecules of Life <ul style="list-style-type: none">a. Molecules of lifeb. Cellular organizationc. Movement of substances across membraned. Cell cycle and divisione. Cellular energetics
II.	Genetics and Evolution <ul style="list-style-type: none">a. Basic geneticsb. Molecular geneticsc. Biodiversity and evolution
III.	Organisms and Environment <ul style="list-style-type: none">a. Essential life processes in plantsb. Essential life processes in animalsc. Reproduction, growth and developmentd. Coordination and responsee. Homeostasisf. Ecosystems
IV.	Health and Diseases <ul style="list-style-type: none">a. Personal healthb. Diseasesc. Body defence mechanisms

Elective Part – the following electives have been selected:

V.	Human Physiology: Regulation and Control <ul style="list-style-type: none">a. Regulation of water content (osmoregulation)b. Regulation of body temperaturec. Regulation of gas content in bloodd. Hormonal control of reproductive cycle
VI.	Biotechnology <ul style="list-style-type: none">a. Techniques in Modern Biotechnologyb. Applications in Biotechnologyc. Bioethics

Investigatory Study:

Scientific inquiry is one of the curriculum emphases which recur throughout the curriculum. It is expected that students will further develop skills in planning and conducting investigations, communicating information and understanding, scientific thinking and problem-solving as well as working individually and in teams. In addition to practical work in lesson time, there are 20 hours allocated for arranging relatively large-scale or cross-topic investigations. This provides students with opportunities to develop the full range of skills and appreciate the nature of science when they conduct individual or group investigative projects.

Part 3: Assessment

Component	Outline	Weighting	Duration
Public examination	Paper 1 Compulsory Part	60%	2.5 hours
	Paper 2 Elective Part	20%	1 hour
School-based assessment (SBA)	Practical related tasks	20%	

Practical related tasks:

Students are required to perform a stipulated number of pieces of practical work. The practical work should be integrated closely with the curriculum content and form a part of the normal learning and teaching process. In investigative work, students are required to: design and perform investigations; present, interpret and discuss their findings; and draw appropriate conclusions. They are expected to make use of their knowledge and understanding of biology in performing these tasks, through which their practical, process and generic skills will be developed and assessed.

Elective Part	20 % (50 hours)
SBA	6 % (16 hours)

Total lesson time: 250 hours for S4 to S6

Part 2: Curriculum

Compulsory Part - both core and extended components will be covered in the curriculum

I. Heat and Gases

- a. Temperature, heat and internal energy
- b. Transfer processes
- c. Change of state
- d. Gases

II. Force and Motion

- a. Position and movement
- b. Force and motion
- c. Projectile motion
- d. Work, energy and power
- e. Momentum
- f. Uniform circular motion
- g. Gravitation

III. Wave Motion

- a. Nature and properties of waves
- b. Light
- c. Sound

IV. Electricity and Magnetism

- a. Electrostatics
- b. Circuits and domestic electricity
- c. Electromagnetism

V. Radioactivity and Nuclear Energy

- a. Radiation and radioactivity
- b. Atomic model
- c. Nuclear energy

Elective Part

The following electives have been selected:

VI. Atomic World

- a. Rutherford's atomic model
- b. Photoelectric effect
- c. Bohr's atomic model of hydrogen
- d. Particles or waves
- e. Probing into nano scale

VII. Energy and Use of Energy

- a. Electricity at home
- b. Energy efficiency in building and transportation
- c. Renewable and nonrenewable energy sources

Part 3: Assessment

Component	Outline	Weighting	Duration
Public examination	Paper 1 Compulsory Part	60%	2½ hrs
	Paper 2 Elective Part	20%	1 hr
School based assessment (SBA)	Practical related tasks	20%	

Practical related tasks here refer to laboratory work or investigative study in Physics. In S5 and S6, students' performance in practical work and reporting of practical work will be assessed. Details of these practical-related abilities are as follows:

- (a) to organize and perform practical work, including the use of suitable apparatus, equipment, and the appropriate manipulative skills in carrying out the work;
- (b) to make accurate observations and measurements;
- (c) to record and to present results in an appropriate form;
- (d) to interpret and discuss results, and to draw appropriate conclusions.

Part 2: Curriculum

Compulsory Part - both core and extended components will be covered.

I. Business Environment

- a. Hong Kong Business Environment
- b. Forms of Business Ownership
- c. Business Ethics and Social Responsibilities

II. Introduction to Management

- a. Management Functions
- b. Key Business Functions
- c. Small and Medium Enterprises (SMEs)

III. Introduction to Accounting

- a. Purposes and Role of Accounting
- b. The Accounting Cycle
- c. Uses of Financial Statements
- d. Accounting Assumptions, Principles and Conventions
- e. Basic Ratio Analysis

IV. Basics of Personal Financial Management

- a. Time value of Money
- b. Consumer Credit
- c. Personal Financial Planning and Investments
- d. Stock Trading as an Investment

Elective Part

The following elective has been selected:

Accounting Module

V. Financial Accounting

- a. Books of Original Entry and Types of Ledgers
- b. Period-end Adjustments Relating to the Preparation of Financial Statements
- c. Financial Reporting for Different Forms of Business Ownership
- d. Control Systems
- e. Generally Accepted Accounting Principles
- e. Financial Analysis
- f. Incomplete Records

VI. Cost Accounting

- a. Cost Classification, Concepts and Terminology
- b. Marginal and Absorption Costing
- c. Cost Accounting for Decision-making

公開考試

本科公開考試分兩卷進行：

內容	比重	評核形式	考試時間
卷一 歷代發展	48%	設必答題，涵蓋甲、乙部，佔 40 分（提供多項資料，考核學生不同能力，預期作答時間為 55 分鐘）；其餘甲部及乙部各設三題，考生須分別選答其中一題，佔 50 分。	2 小時 15 分
卷二 歷史專題	50 分	設六單元，每單元各設三題，學生從所選的兩個單元中各選答一題，共答兩題完卷。	1 小時 20 分鐘

The Y.W.C.A. Hioe Tjo Yoeng College
Senior Secondary Curriculum
History

Part 1: Curriculum framework and time allocation

Introduction, Theme A and Theme B	92% (230 hours)
Other Learning Activities	8% (20 hours)

Total lesson time: 250 hours for S4 to S6

Part 2: Curriculum

I. Introduction: The Making of the Modern World

II. Theme A: Modernization and Transformation in Twentieth-Century Asia

- (1) Modernization and transformation of Hong Kong
 - (i) Political and institutional changes
 - (ii) Development as an international city
- (2) Modernization and transformation of China
 - (i) Early attempts at modernization – reforms and revolutions
 - (ii) Socialist modernization in the Maoist period and the evolution of “socialism with Chinese characteristics” in the post-Mao period
- (3) Modernization and transformation of Japan and Southeast Asia
 - (i) Japan
 - (ii) Southeast Asia: from colonies to independent countries

III. Theme B: Conflicts and Cooperation in the Twentieth-Century World

- (4) Major conflicts and the quest for peace
 - (i) International relations from 1900 to 1914
 - (ii) The two world wars and the peace settlements
 - (iii) Major conflicts after WWII and attempts to make peace :
 - a. Superpower rivalries
 - b. Other major conflicts and attempts at making peace

The quest for cooperation and prosperity

 - (iv) International economic cooperation
 - (v) International social and cultural cooperation

Part 3: Assessment

Component	Outline	Weighting	Duration
Public examination*	Paper 1 Data-based Questions	60%	2 hours
	Paper 2 Essay-type Questions	40%	1 1/2 hours

* Theme A (3)(ii) and Theme B (4)(iii)b will only be examined in Paper 2.

1. Paper 1 will consist of data-based questions. Candidates should attempt all the questions. Various types of historical sources will be used, which may include extracts from written sources, statistics, and visual material such as maps, cartoons and photographs.
2. Paper 2 will consist of seven essay-type questions, of which candidates may attempt any **two**.

The Y.W.C.A. Hioe Tjo Yoeng College
Senior Secondary Curriculum
Economics

Part 1: Curriculum framework and time allocation

Compulsory Part	77.6 % (194 hours)
Elective Part	8.8 % (22 hours)
Enquiry Activities	13.6 % (34 hours)

Total lesson time: 250 hours for S4 to S6

Part 2: Curriculum

Compulsory Part - both core and extended components will be covered

I. Basic Economic Concepts

- a. Scarcity, choice, opportunity cost and the three basic economic problems
- b. Positive and normative statements

II. Firms and Production

- a. Ownership of firms and types of goods and services produced
- b. The objectives of firms and firms in different types/stages of production
- c. Factors of production and division of labour
- d. Production and costs in the short run and long run

III. Market and Price

- a. Law of demand
- b. Individual demand and market demand
- c. Individual supply and market supply
- d. Interaction between demand and supply and functions of prices
- e. Consumer and producer surplus
- f. Price elasticity of demand and price elasticity of supply
- g. Market intervention

IV. Competition and Market Structure

- a. Perfect competition and imperfect competition (monopolistic competition, oligopoly and monopoly)

V. Efficiency, Equity and the Role of Government

- a. Efficiency and equity and the policy concerns

VI. Measurement of Economic Performance

- a. National income and general price level and its measurements
- b. Unemployment and underemployment rates
- c. Recent trends of national income, general price level and unemployment in Hong Kong

VII. National Income Determination and Price Level

- a. Aggregate demand (AD) and Aggregate supply (AS)
- b. The determination of level of output and price

VIII. Money and Banking

- a. Money and banks
- b. Money supply and money demand
- c. Determination of interest rate in the money market
- d. Hong Kong as a financial centre

IX. Macroeconomic Problems and Policies

- a. Business cycles
- b. Inflation and deflation and unemployment
- c. Fiscal policy and monetary policy

X. International Trade and Finance

- a. Free trade and trade barriers
- b. Brief introduction to the balance of payments account
- c. Exchange rate

Elective Part

The following elective has been selected:

XI. Extension of Trade Theory, Economic Growth and Development

- a. Illustration of gains from trade with the aid of production possibilities frontier
- b. Comparative advantage and its relation to globalization
- c. Measurement of economic growth and development

Investigative Study

Students are required to conduct 54 hours of enquiry study to complete a number of economic analyses and investigations, and produce a written report on each of the tasks performed. Through these tasks, the students are to develop ability in analysing issues from the economic perspective and other generic skills. Students learn to analyse economic issues in news articles, with the emphasis on the application and integration of economic principles and theories. Through doing essays / reports, students record the self-directed exploration and analysis of economic issues.

Part 3: Assessment
